NPIC/IM-3/61

MEMORANDUM FOR: Assistant Chief of Staff, Intelligence, USAF

THROUGH: TALENT Control Officer, USAF

25X1A ATTENTION: [REDACTED] AFCIN 3I

25X1D SUBJECT: Installation Searches on Photography from [REDACTED]

REFERENCES: (a) AFIC Requirements 5/61 through 9/61
(b) Project JN 137-61

25X1D In response to your requirements AFIC-5/61 through AFIC 9/61, a search of five areas from photography of [REDACTED] 25X1D [REDACTED] was accomplished with the following results:

25X1D Glazov Uranium Metals Plant (AFIC-5/61). Photography of Mission [REDACTED] covered the uranium metals plant at Glazov. A brief description is contained in NPIC/MCI-2/61. A more detailed study of the installation has been initiated under NPIC Project JN 157-61, which will be completed on or about 25 July 1961.

Search for Nuclear Reactor at Ulyanovsk (AFIC-6/61). A study within a 50-mile radius of Ulyanovsk revealed no installation identifiable as a possible nuclear reactor site. The area was free of clouds. No SAM sites were observed within the area of search.

SUBJECT: Installation Searches on Photography
from Mission [REDACTED]

NPIC/IM-3/61

25X1D

SSM Search of Akmolinsk Area (AFIC-7/61). The Akmolinsk area was only partially covered by Mission [REDACTED]. A thorough scan of this coverage revealed no indications of SSM deployment. The area was free of clouds. No SAM sites were observed within the area of search.

25X1D

25X1D

SSM Search in Aktyubinsk/Kandagach Area (AFIC-8/61). A thorough scan of Mission [REDACTED] photography covering a 50-mile radius from Aktyubinsk/Kandagach revealed no indications of SSM deployment. The quality of the photographic coverage was good and there was very little cloud cover. No SAM sites were observed within the area of search.

25X1D

SSM Search in Karaganda/Karkaralinsk Area (AFIC-9/61). A thorough scan of Mission [REDACTED] photography covering a 50-mile radius from Karaganda/Karkaralinsk revealed no indications of SSM deployment. Photo quality was good, and the area was nearly cloud-free. However, the area searched was marked by extensive mining activity with associated rail support. Such activity would lend itself readily to missile-deception practices. No SAM sites were observed within the area of search.

FOR THE DIRECTOR, NPIC
